

# Team Vision

What is your team's vision?

How does your supervisor share and implement this vision? Are they effective? In what way?

What voice and input do you have into this vision? In what way is your voice encouraged or discouraged?

Do you feel that your current work contributes to this vision in a way that is fulfilling to you? How so?

Do you feel motivated, inspired, and bought in to this vision? How does this affect your work?

In what ways can your supervisor be more effective in clarifying, implementing and involving you in the team's vision? What might they do better?
